Summary

- Information Systems Professional with over 17 years experience in System Design, Development, Deployment, Maintenance and Administration.

- Excellent problem solving, communication and customer support skills, and the ability to bring business understanding into the development process in order to create solutions to meet business needs. Great team player.

- Primary developer experience with enterprise distributed environments for County, State, and Federal government agencies and large corporations using Microsoft solutions (C#, .NET, ASP .NET, ADO .NET, SQL, Windows Services, Web Services, WCF, SOAP, REST, Web Forms, MVC 5.0, Razor, Entity Framework 6.0) with Waterfall and Agile development methodologies.

Technology Skill Set

Tools/Languages Used
- C# .NET, VB .NET, ASP.NET, ASP, Visual Studio 6.0, 2003 through 2012, Visual Studio Code, HTML, VB Script, JavaScript, Microsoft SQL Server Management Studio for SQL 2005 through 2012, DTS, SSIS, SSRS, Re-Sharper, NHibernate, StructureMap, Log4Net.
- ADO.NET, MVC 5.0, Entity Framework 6.0,

Tiers:
- Back end tier: database management, design, programming and implementation using various data sources (SQL, IBM DB2, Excel files, flat files, Salesforce, etc.), including stored procedures, functions, views, integrations, DTS and SSIS packages, nightly jobs, etc.
- Middle: web services (SOAP and REST), windows services, class libraries, business logic.
- Front end: business web sites, intranet portals, web applications, desktop applications console applications.

Platforms/Servers
- Windows NT through Windows 10, Virtual PCs and Servers, Windows 2000 Server through 2008 R2 Server, HP Unix, IIS, Apache Tomcat, SQL, IBM DB2, Salesforce.

Enterprise Applications
- FileNet CS, IS, P8, Documentum, Kofax.

Experience

2014-Present   Assurant Field Services   Austin, TX
Senior Applications Developer
- Working at a local Austin company that maintains properties for banks and other financial stakeholders, I was on a team that designed, built and maintained a very large system that processed requests for inspections and property preservation orders in order to keep properties up to code.
- Tasks and responsibilities included:
  - working with product owners and business analysts to write business requirements documents and user stories to meet business needs
  - writing software design documents and setting estimates
  - developing new solutions and fixing existing bugs
  - build and release management
  - production support.

Development Environment:
- Visual Studio 2012, C#, ASP .NET, SQL Server 2012, ADO .NET, Entity Framework, Log4Net, Resharper, Subversion, TFS, Waterfall, Agile.

2013-2014   Department of Veteran Affairs   Austin, TX
Senior Applications Developer
- Working on an ASP .NET application for veterans health care, I was on a team maintaining and developing processes to ensure the integrity of billing from medical service providers to the VA.
- Tasks and responsibilities included:
  - developing new features and fixing existing bugs
  - writing TSQL reports and ad hoc queries
  - providing technology insight for management

Development Environment:
- C#, ASP .NET, SQL Server 2008 R2, NHibernate, Log4Net, Resharper, TFS, Waterfall.

2012-2013   Allied Consultants   Austin, TX
Applications Developer / SQL Developer
- Working on a large migration project, I was on a team migrating data from several different legacy systems to a new Line of Business system responsible for retirement benefits for Texas State employees.
- Tasks and responsibilities included:
  - data discovery and documentation
  - developing SSIS packages for the ETL process
  - writing T-SQL scripts, stored procedures and functions
  - writing C# .NET assemblies used in the SSIS packages

Development Environment:
- SQL Server 2008 R2, SSIS, SSRS, T-SQL, Visual Studio 2008, C# .NET.

2009-2012 5.11 Tactical   Modesto, CA
Applications Developer / SQL Developer / DBA
- Working for a global sales company 5.11 Tactical, I was the resident DBA, BI and software developer responsible for maintaining and building upon the line of business system that stored all sales information and reporting for management and sales representatives.
- Tasks and responsibilities included:
  - SQL server DBA responsibilities (database backups, disaster recovery, performance issues, patching, etc.)

- creating and maintaining data transfer DTS and SSIS packages and jobs that transferred data from the main sales database (IBM DB2) to SQL databases used for reporting and as data sources for the company intranet and internet sites
- developed and maintained the company's intranet and extranet sites
- writing and managing SSRS reports

Development Environment:
- SQL Server 2000, 2005, 2008, 2008 R2, DTS, SSIS, SSRS, T-SQL, Visual Studio 2005, 2008, ASP, ASP.NET, VB.NET, C# .NET.

2004-2009 Office of Information and Technology   Sacramento, CA
Applications Developer
- Working for Sacramento County OCIT I was on a team of developers responsible for various Sacramento County departments' online content stored in an enterprise content management system (FileNet).
- Tasks and responsibilities included:
  - building and maintaining FileNet content management intranet portals for County departments such as the Sacramento County Sherriff's office, the District Attorney's office and the Sacramento county jail system
  - Maintaining application databases and writing stored procedures and functions
  - Set up scan solutions using Kofax to migrate paper records into digital records
  - Upgraded FileNet to P8 and migrated content and metadata from older version of FileNet into P8.
  - Building various other .NET and ASP .NET solutions for Sacramento County offices.

Development Environment:
- Visual Studio 6.0, 2003, 2005, ASP, ASP.NET, VB, VB.NET, C# .NET, COM, SQL Server 2000, 2005, DTS, T-SQL, Windows Services, Web Services, FileNet.

2001–2004 Softmatrix on contract with Hewlett Packard   Roseville, CA
Systems Engineer
- Working for Hewlett Packard as a systems engineer I maintained and built upon their web content management system that consisted of all documentation, software, drivers, etc. on their company products web site.
- Tasks and responsibilities included:
  - developing new features and fixing existing bugs
  - administering the SQL databases and NT/2000 servers
  - developed an export tool and migrated content from one content management system (FileNet) to another (Documentum)

Development Environment:
- ASP, IIS, Visual Basic, Windows NT and 2000, SQL Server, FileNet, Unix, shell scripting.

Education and Training

1992-1994 Sacramento City College   Sacramento, CA
- AA, Computer Science Focus

1995-2000 CSU Sacramento   Sacramento, CA
- BA, Humanities and Religious Studies, Minor Computer Science
- Studied software engineering at CSUS (advanced data structures and programming concepts, runtime analysis, OOP, database management, systems programming) using Pascal, C, Delphi, and Motorola assembly.

2006
- IBM/FileNet Desktop Administration Certified

2008
- IBM/FileNet P8 Certified: CM Administrator 2A
- IBM/FileNet P8 Certified: TCM Administrator 2A
- IBM/FileNet P8 Certified: FM Administrator 2A

2012
- Microsoft SQL 2008 certification clinics 6188, 6189 and 6190.
